CONVECCIÓN & PRECIPITACIÓN

OLR Anomalías

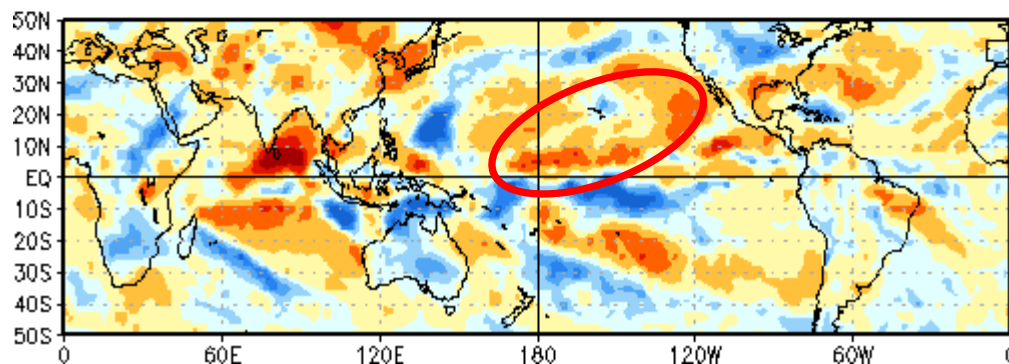

1 APR 2017 to 10 APR 2017

11 APR 2017 to 20 APR 2017

21 APR 2017 to 30 APR 2017

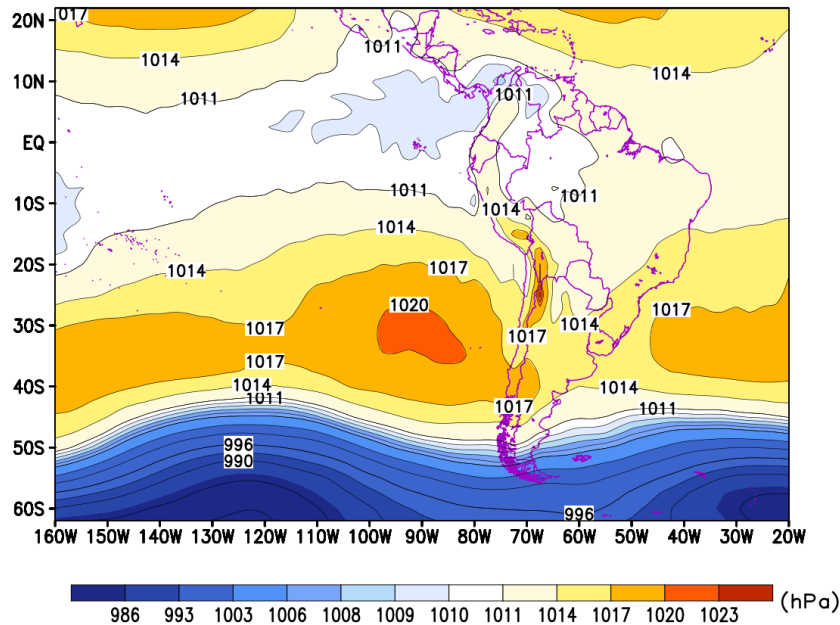

Las anomalías de OLR persisten con un patrón estacionario en el Pacífico ecuatorial, aunque en menor intensidad a marzo.

La convección frente a la costa noroccidental de Sudamérica y se ha debilitado y reducido hacia el Pacífico central.

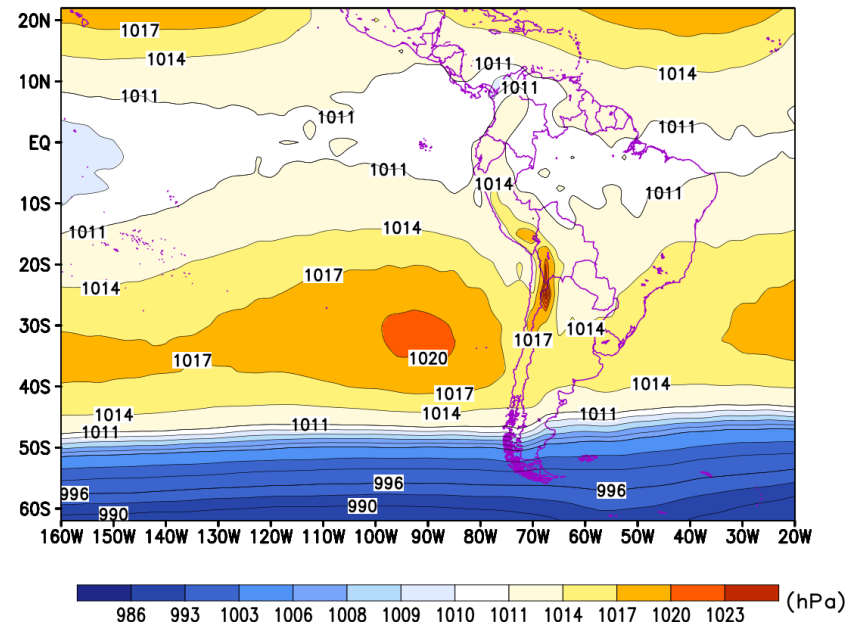

Por otro lado, la sequedad aun se mantiene intensa a lo largo de la línea de cambio de fecha.

Presentación

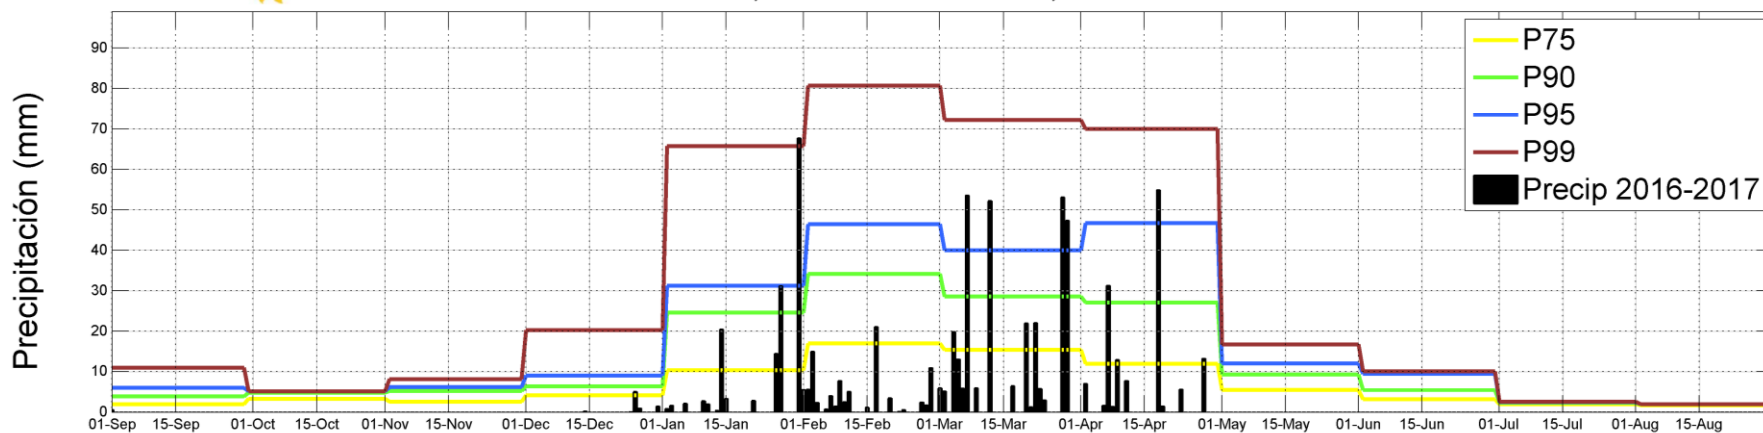

El presente servicio de información climática contempla la evolución de las lluvias en la Región Tumbes, Piura, Lambayeque, La Libertad y Cajamarca.

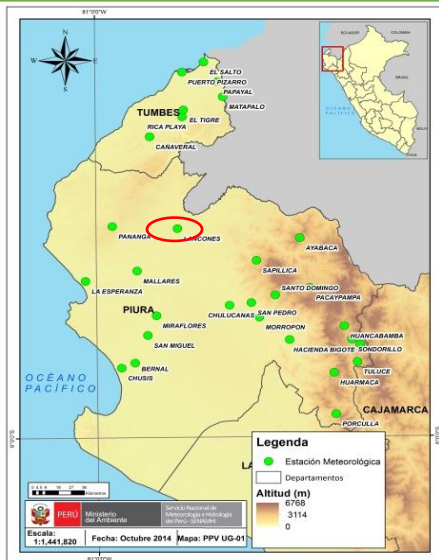

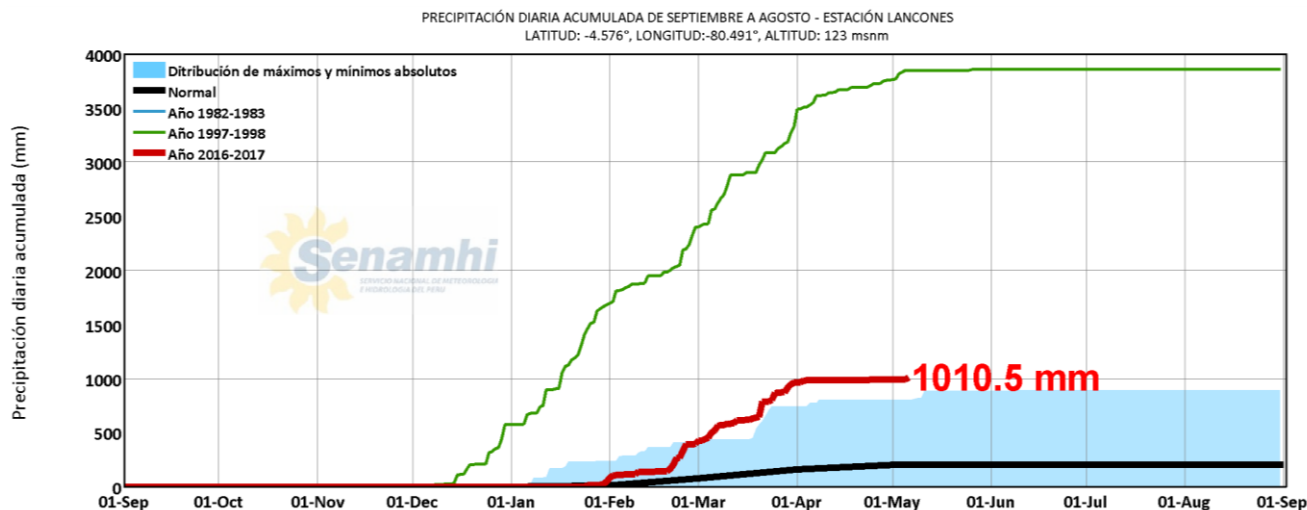

Se presenta el análisis de las precipitaciones diarias y los acumulados en el periodo de lluvias (Setiembre 2016-Mayo 2017) con mayor énfasis en los días que superan los percentiles 90, 95 y 99.

	P75: día moderadamente lluvioso
	P90: día lluviosos
	P95: día muy lluvioso
	P99: día extremadamente lluvioso

LATITUD: -6.237°, LONGITUD: -79.339°, ALTITUD: 2650 msnm

PRECIPITACIÓN DIARIA - ESTACIÓN CACHICADAN LATITUD: -8.102°, LONGITUD: -78.153°, ALTITUD: 2890 msnm

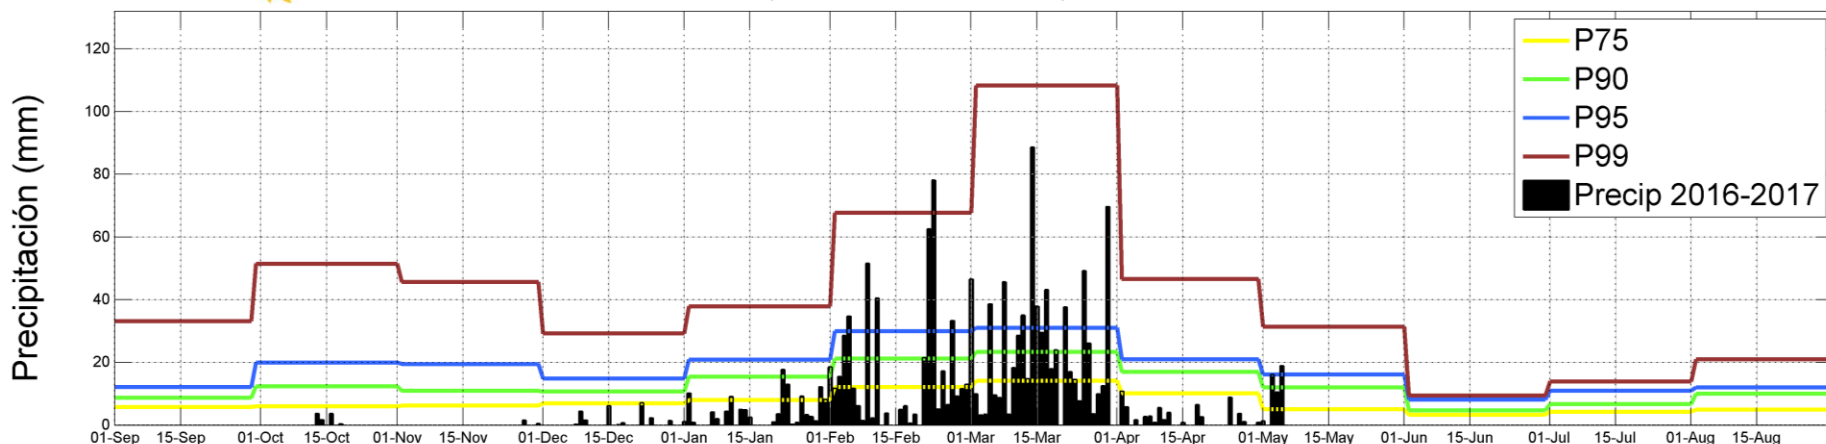

PRECIPITACIÓN DIARIA - ESTACIÓN COSPAN LATITUD: -78.541°, LONGITUD: -7.428°, ALTITUD: 2300 msnm

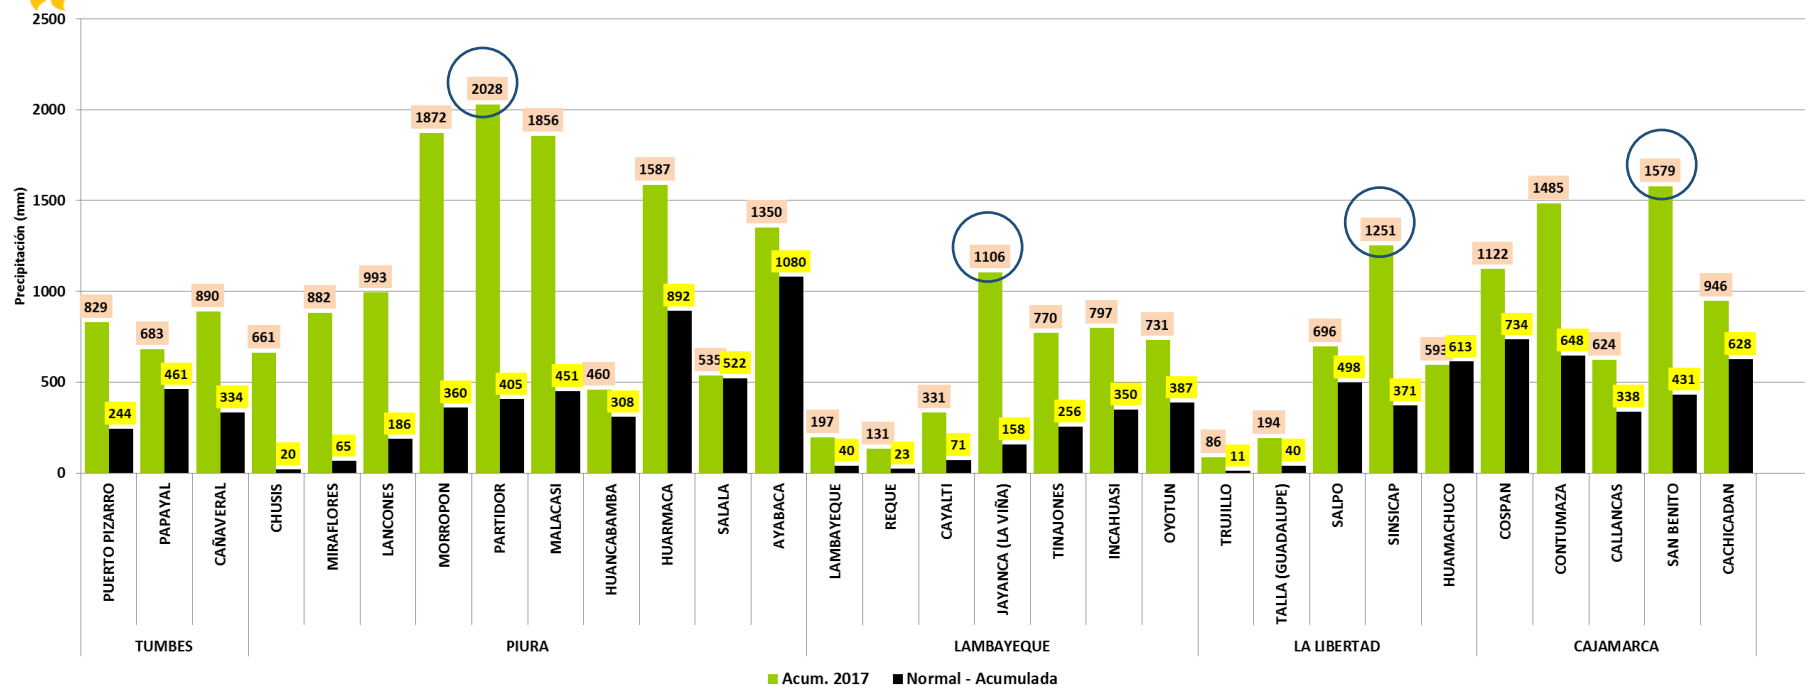

PRECIPITACIÓN DIARIA - ESTACIÓN CONTUMAZA LATITUD: -7.356°, LONGITUD: -78.83°, ALTITUD: 2610 msnm

Precipitación acumulada (01 de enero al 07 de mayo de 2017)

A lo largo de los meses de verano 2017, las lluvias acumuladas más cuantiosas en el norte del país se registraron en Piura, Cajamarca, La Libertad y Lambayeque, alcanzando valores de hasta 2028, 1579, 1251 y 1106 mm, siendo sus normales climáticas 405, 431, 371 y 158 mm respectivamente.

Anomalía de la Temperatura Máxima

Durante los seis primeros días del mes de mayo, se registra un ligero aumento de las anomalías de la **temperatura máxima**, con respecto al mes de abril a lo largo del litoral, alcanzando anomalías de hasta +2,2 °C en la estación Trujillo (La Libertad) y +3,2°C en la estación Huarmey (Ancash). **Ver tabla 1 Y 2.**

Anomalía de la Temperatura Mínima

Durante los primeros seis días del mes de mayo, la **temperatura mínima** aumento ligeramente respecto al mes de abril, con anomalías que alcanzaron +3,3°C en la estación Huarney (Ancash) y +2,8°C, y la estaciones Fonagro (Ica). **Ver tabla 1 Y 2**
